## Inició de Estación de Crecimiento

Del 1 Enero al 11 Octubre 2020

# Inició de Estación de Crecimiento

Se relaciona con el inicio de la temporada de lluvias la cual permitirá **determinar la época de siembra de temporal.**

Para **dar inicio a la estación de crecimiento** se deben de acumular **50 mm de humedad residual.** La humedad residual se calcula restando a la Precipitación el 50% de la Evapotranspiración Potencial.

$$HR = PP - ETP * 0.5$$

Donde:

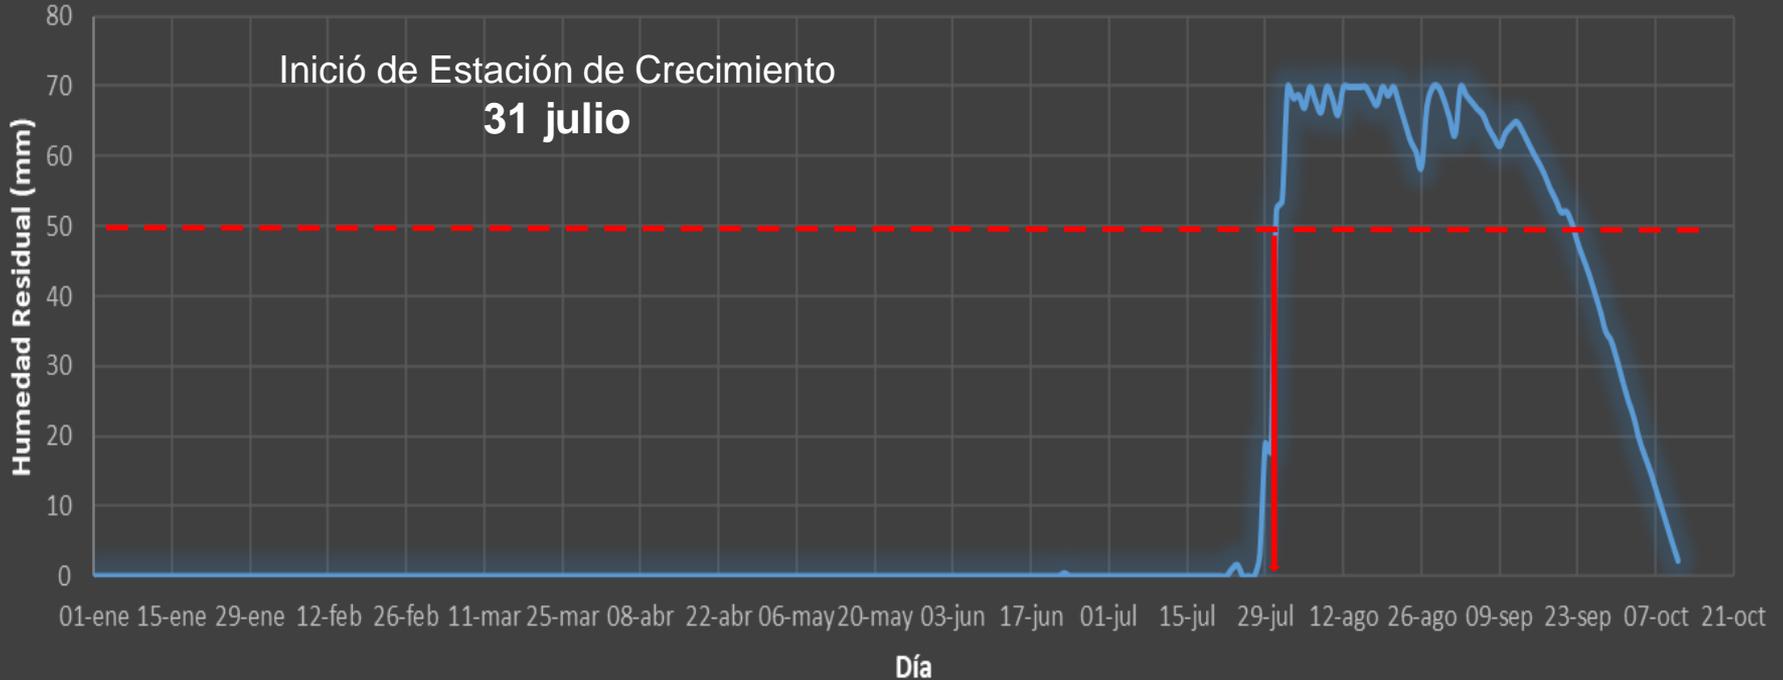

HR = Humedad Residual (mm)

PP= Precipitación (mm)

ETP= Evapotranspiración potencial (mm)

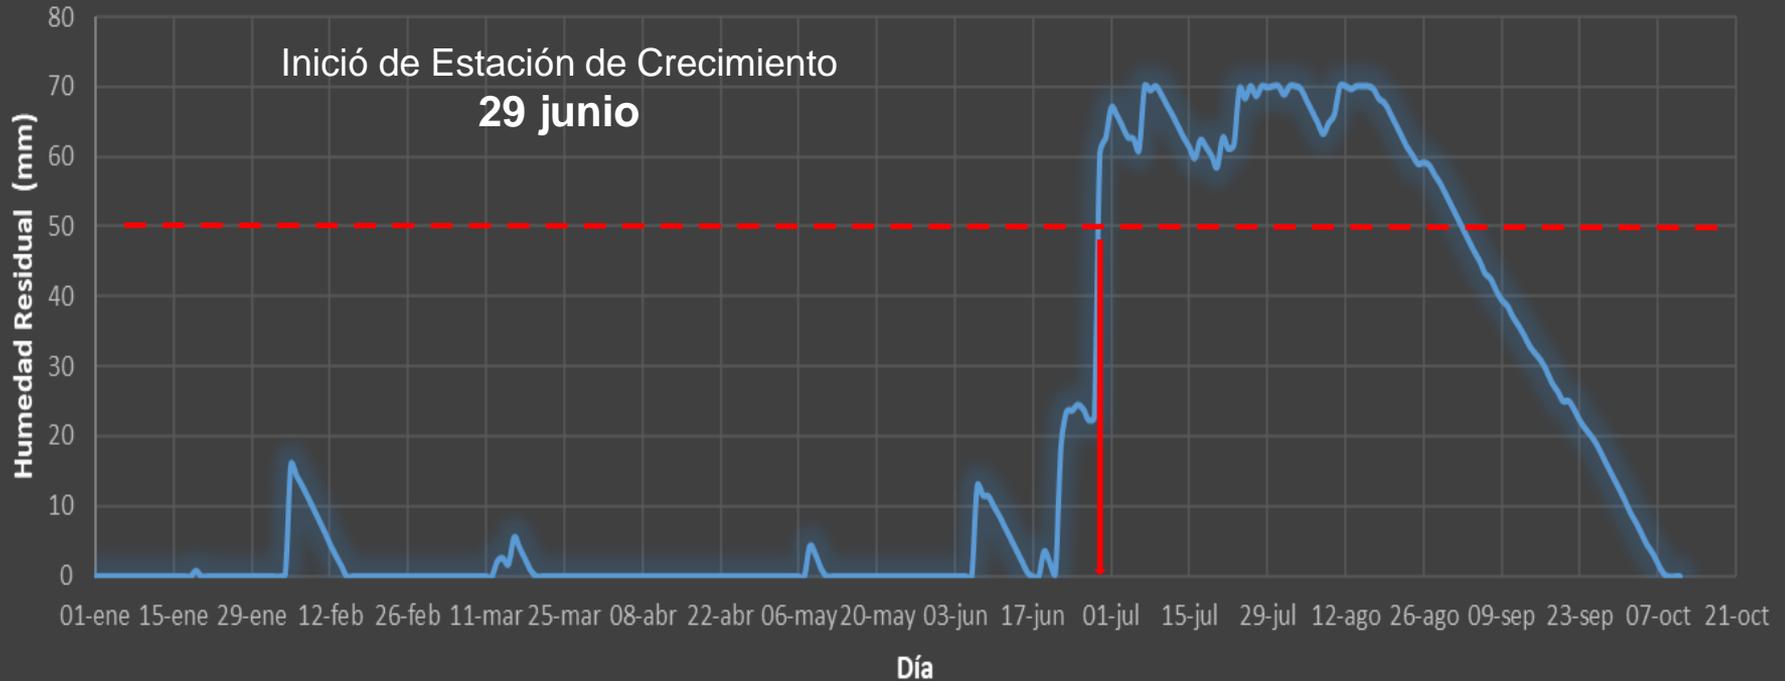

# La Providencia – Abasolo

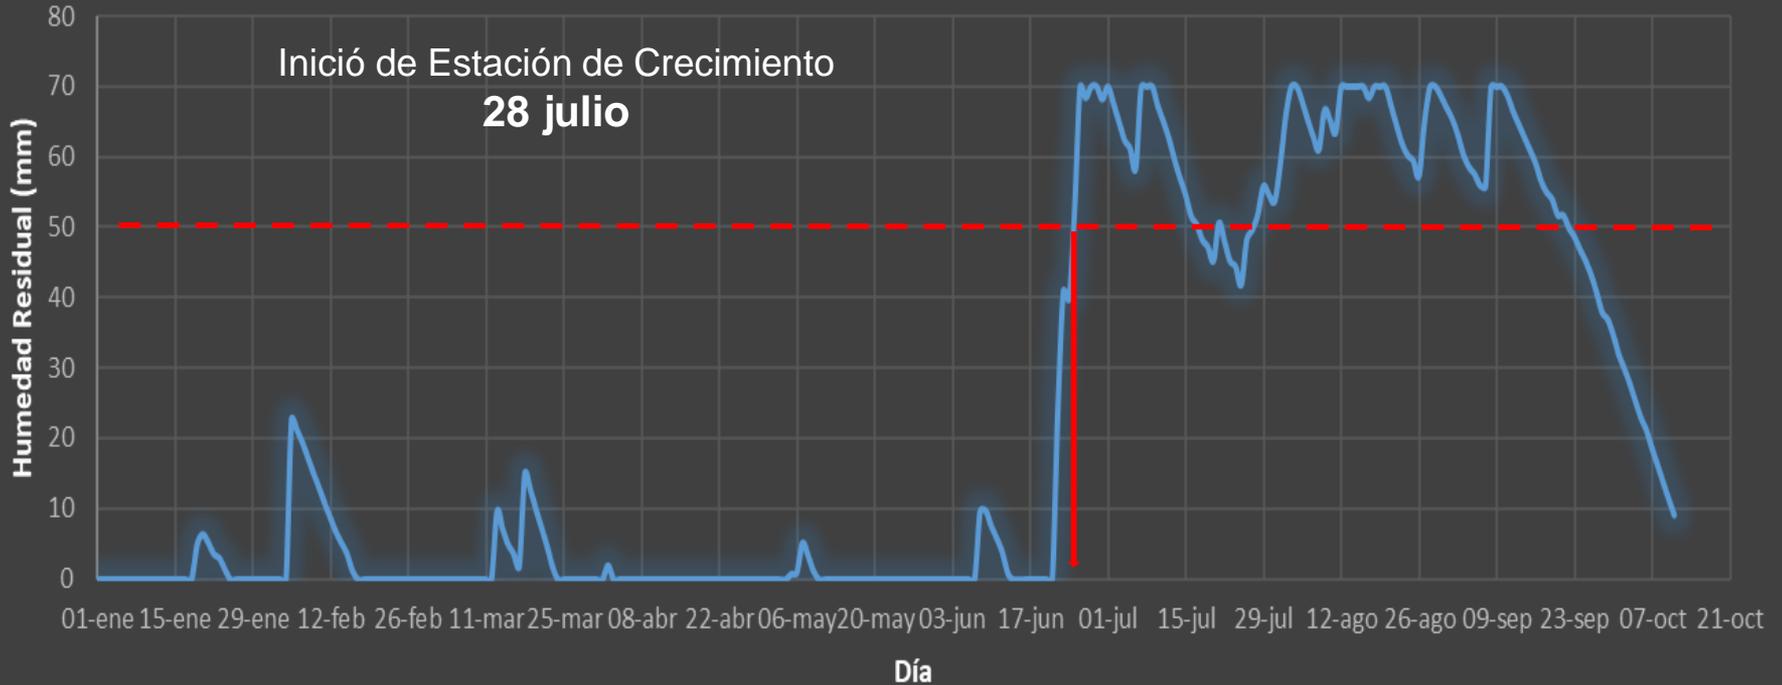

# San Lorenzo – Acámbaro

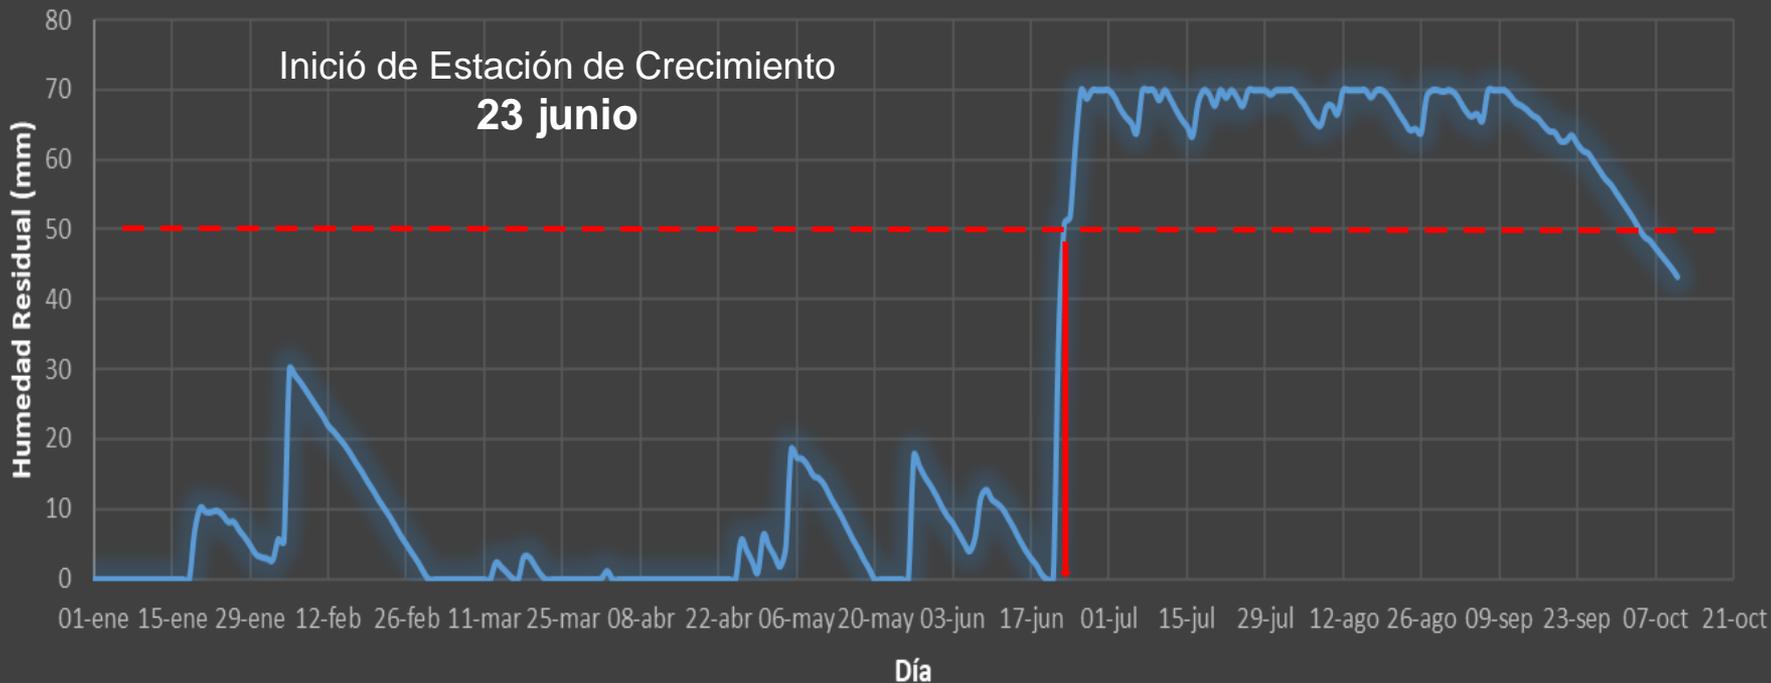

# IT Roque – Apaseo el Alto

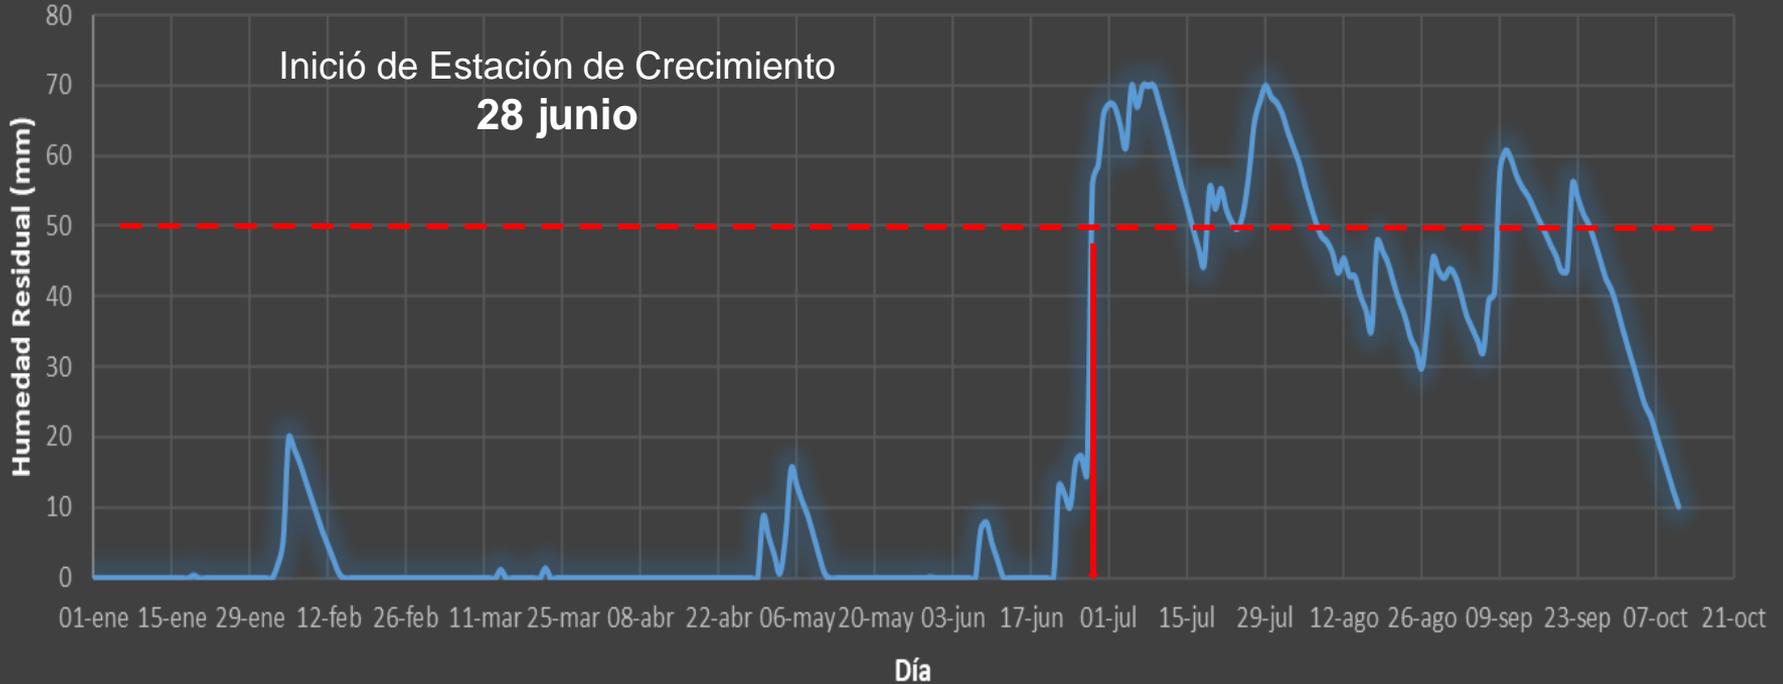

# Los Tecolotes – Apaseo el Alto

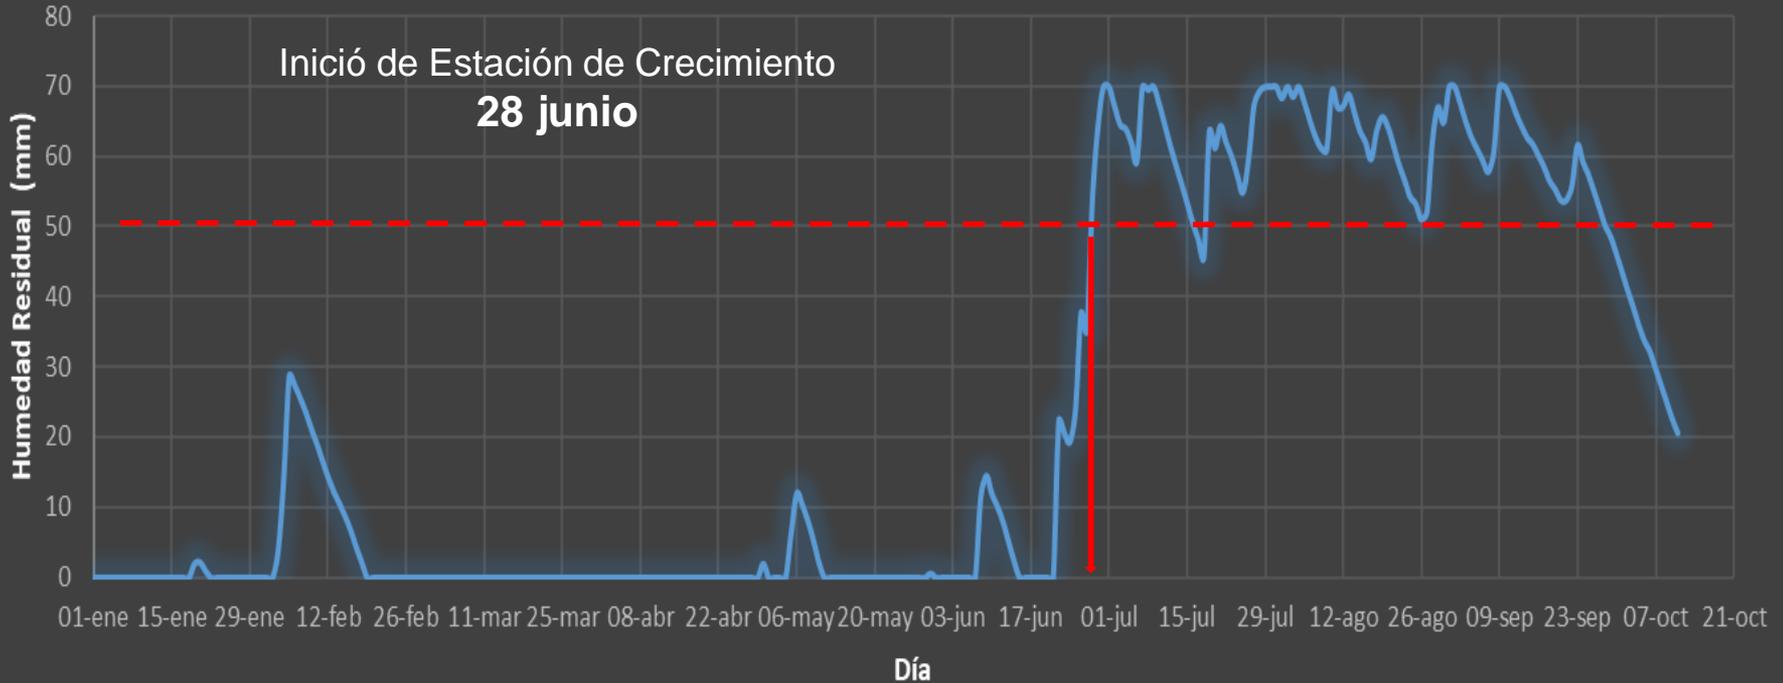

# El Carril- Apaseo el Grande

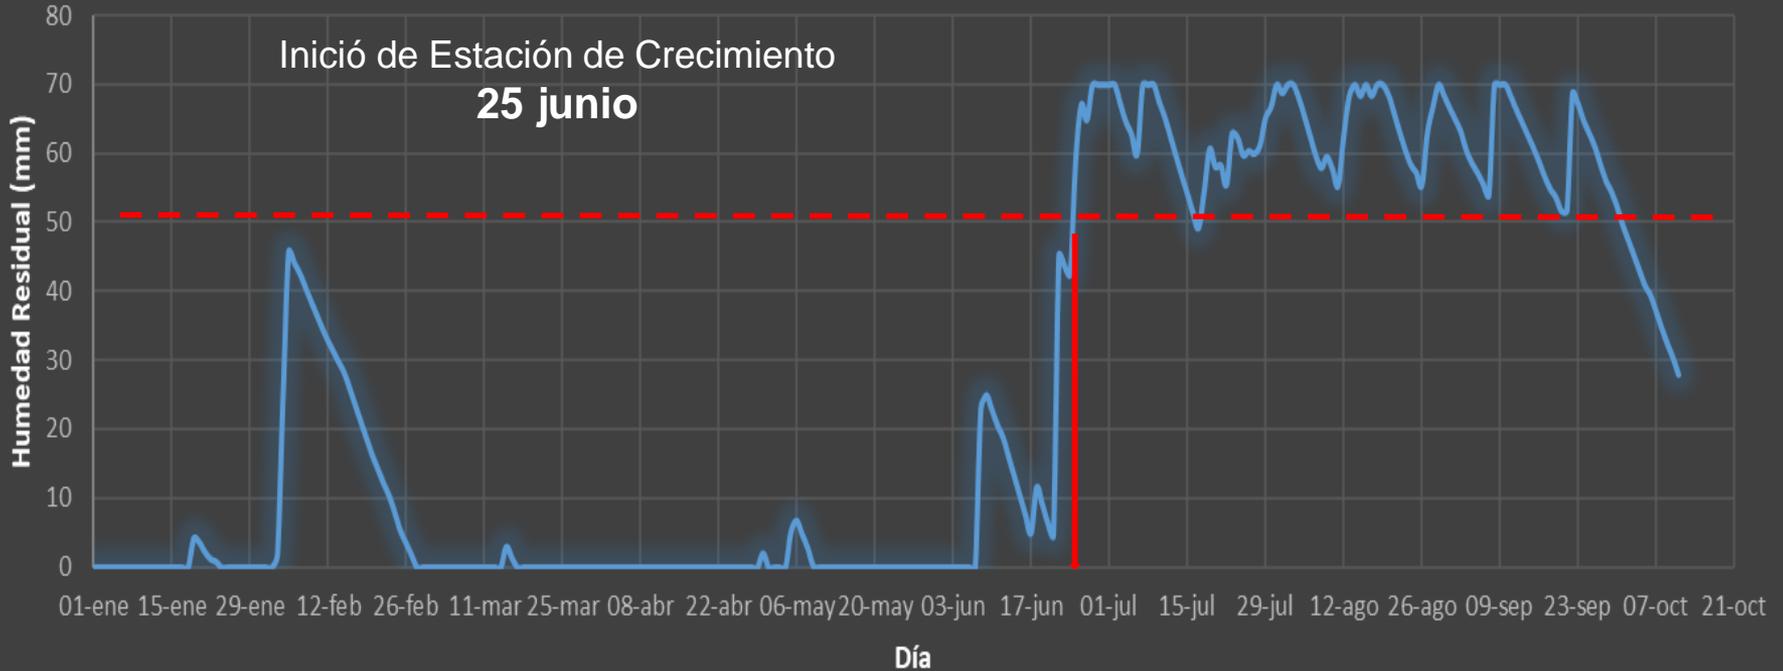

# Inifap Cebaj – Celaya

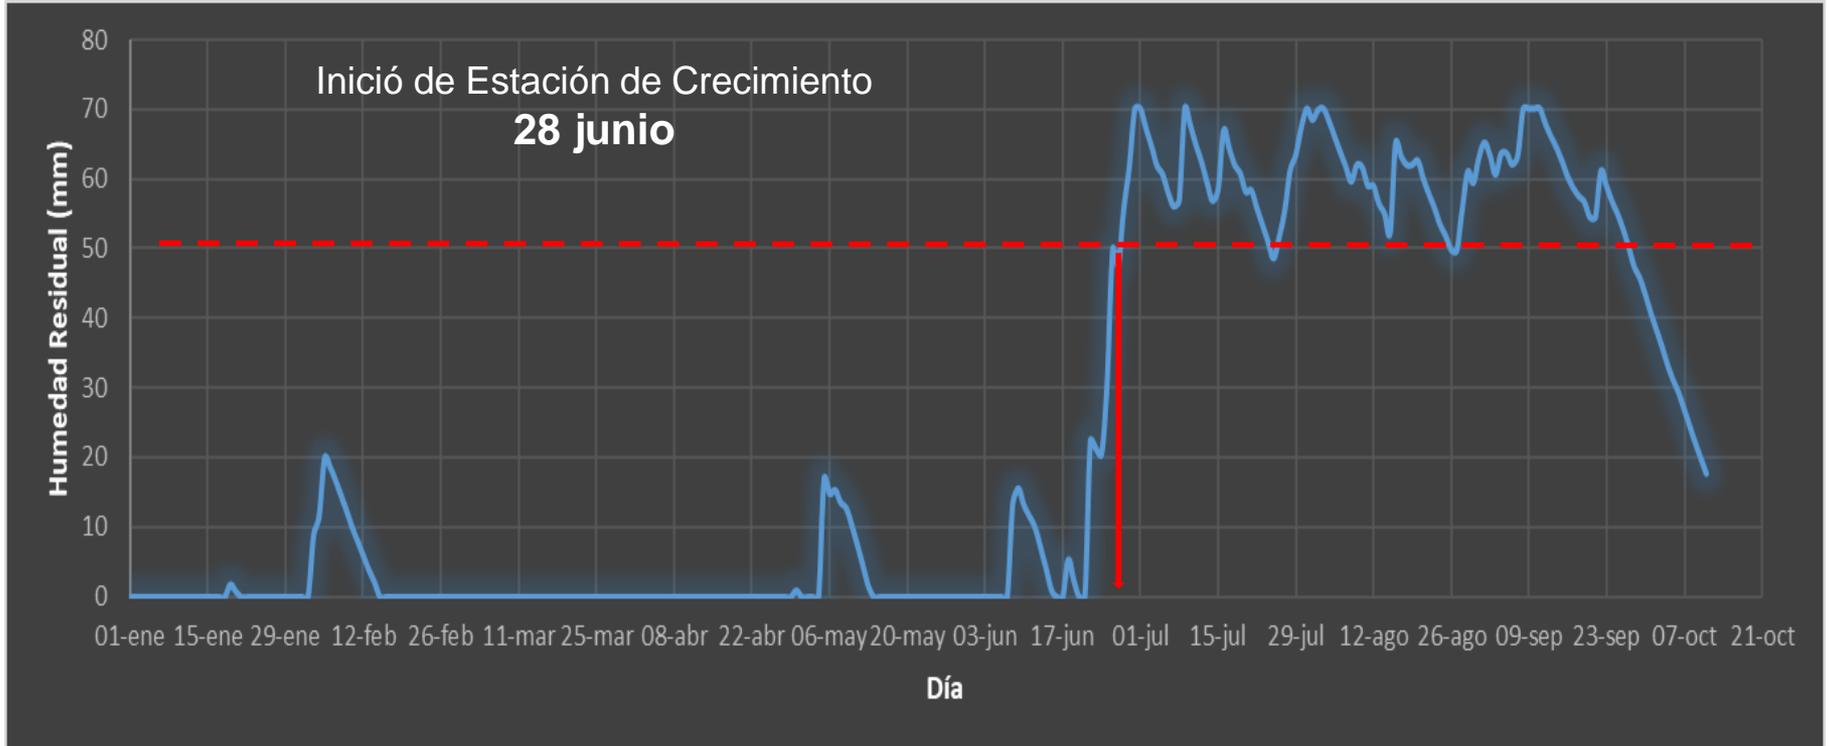

# La Machuca – Celaya

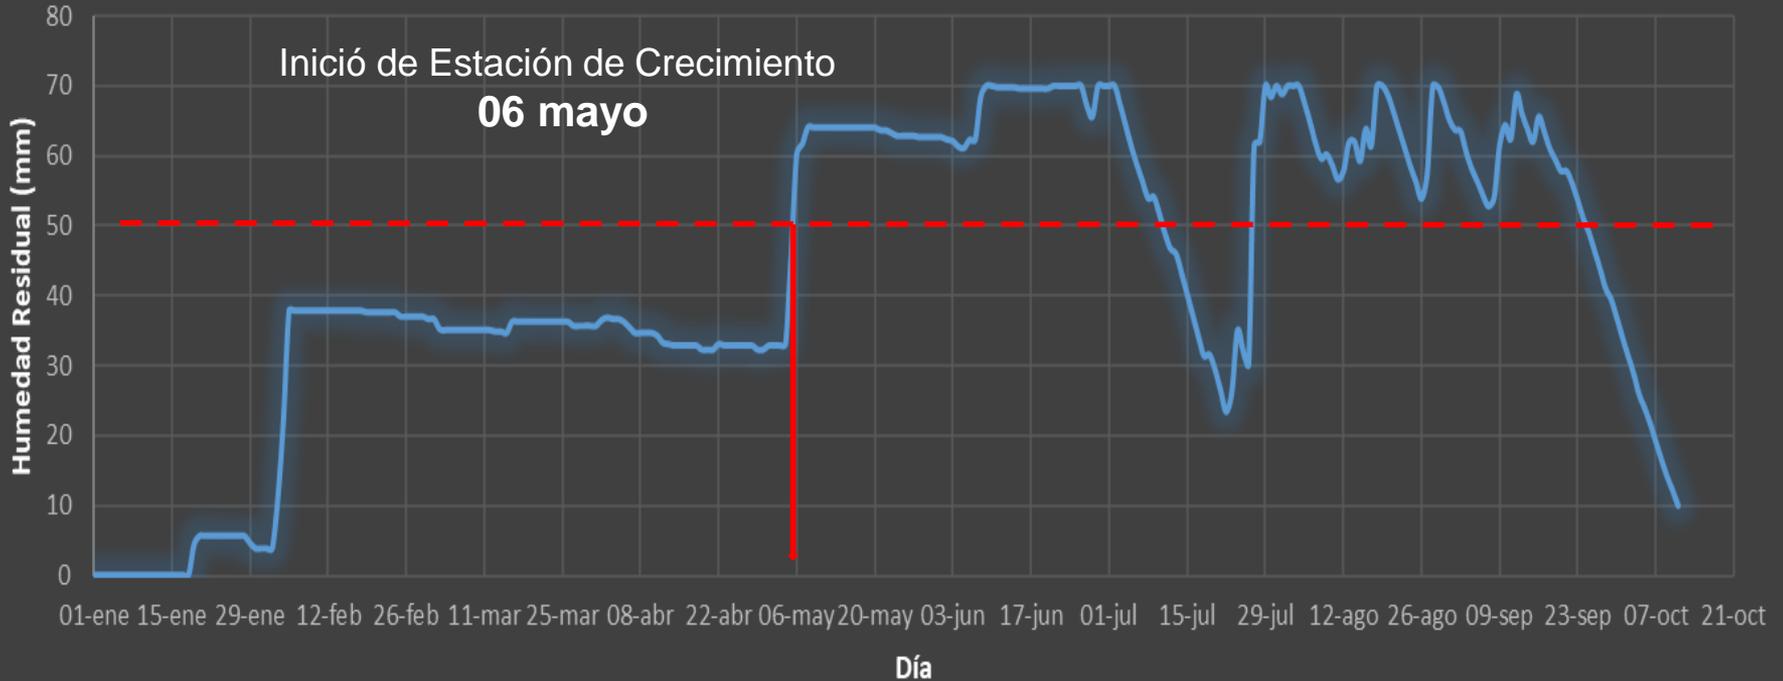

# Purísima de Chamacuero – Comonfort

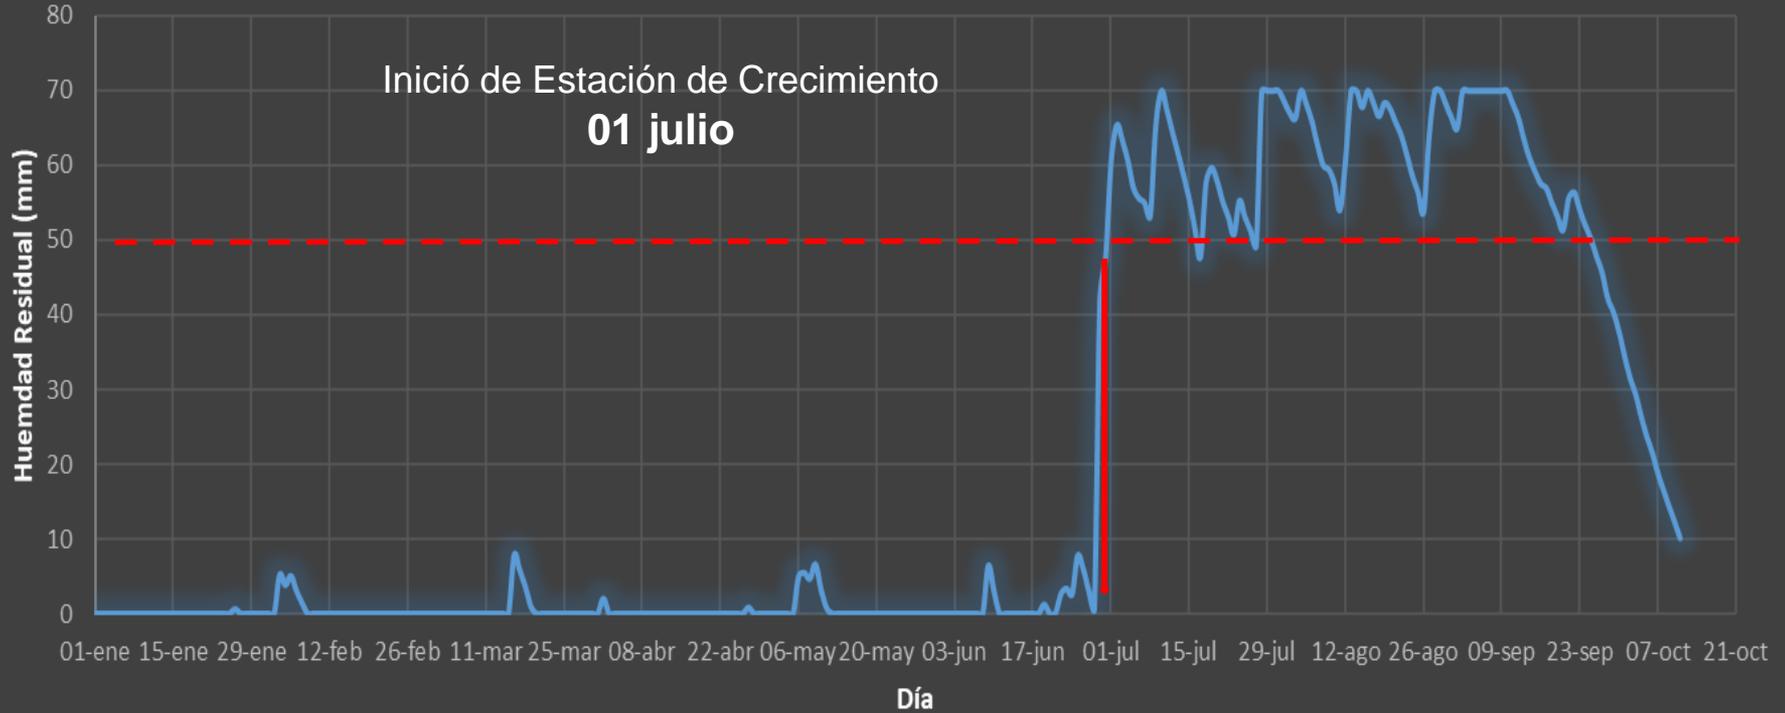

# El Coyote- Cortazar

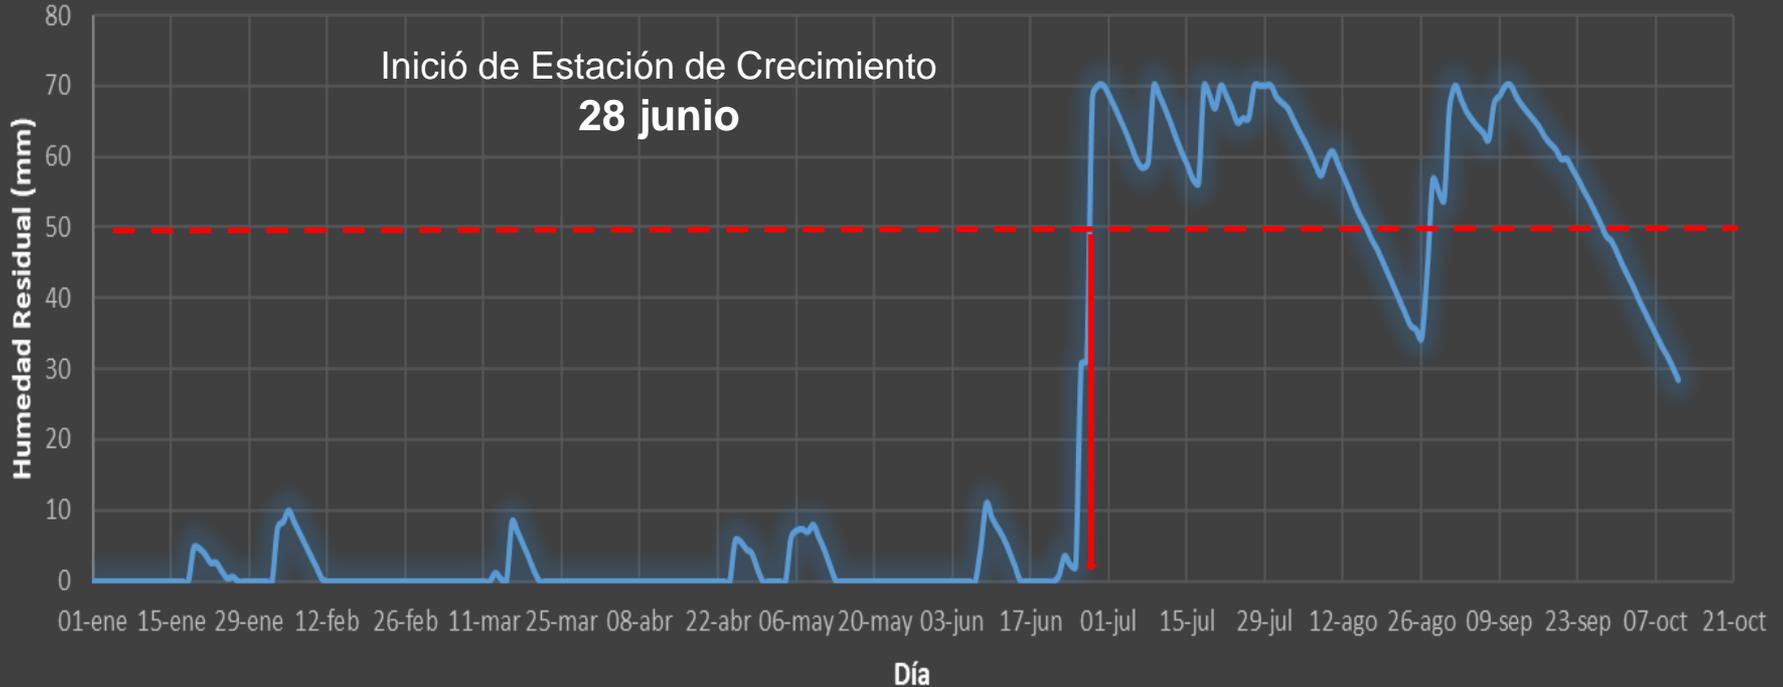

# Campo Alegre - Cuerámara

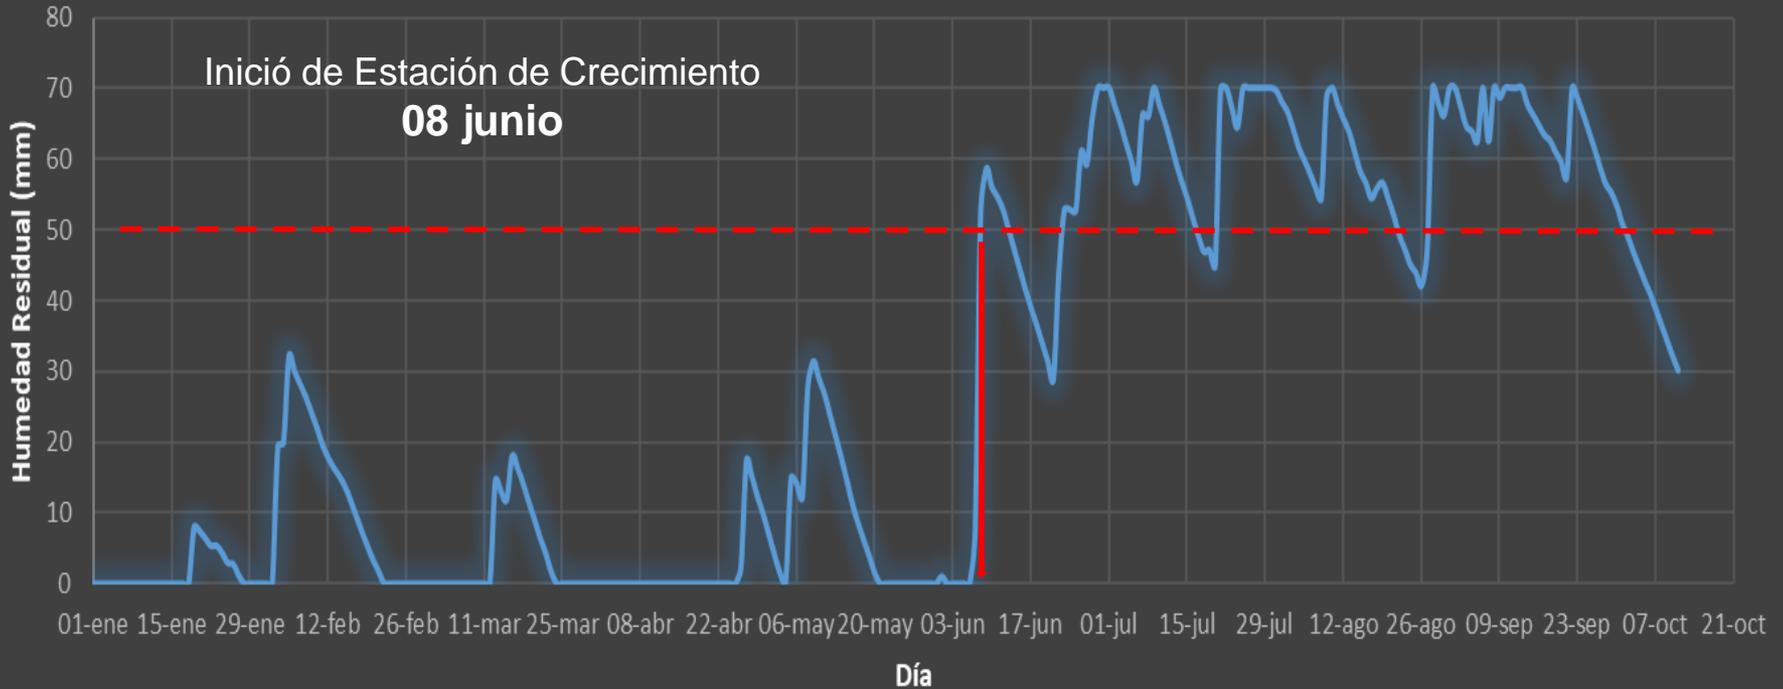

# El Cardonal- Dolores Hidalgo

Inició de Estación de Crecimiento  
**28 junio**

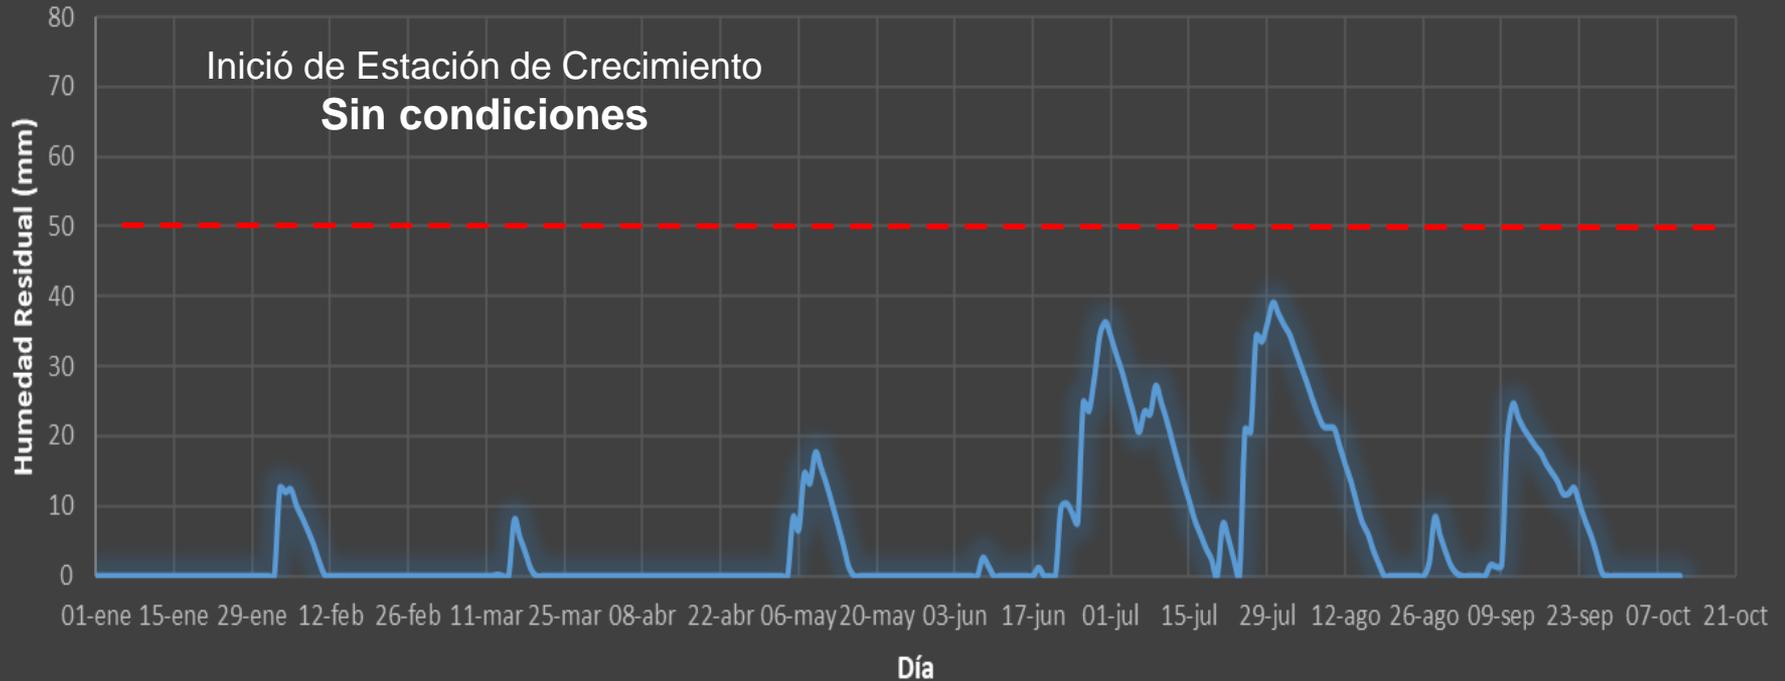

# El Carmen- Dolores Hidalgo

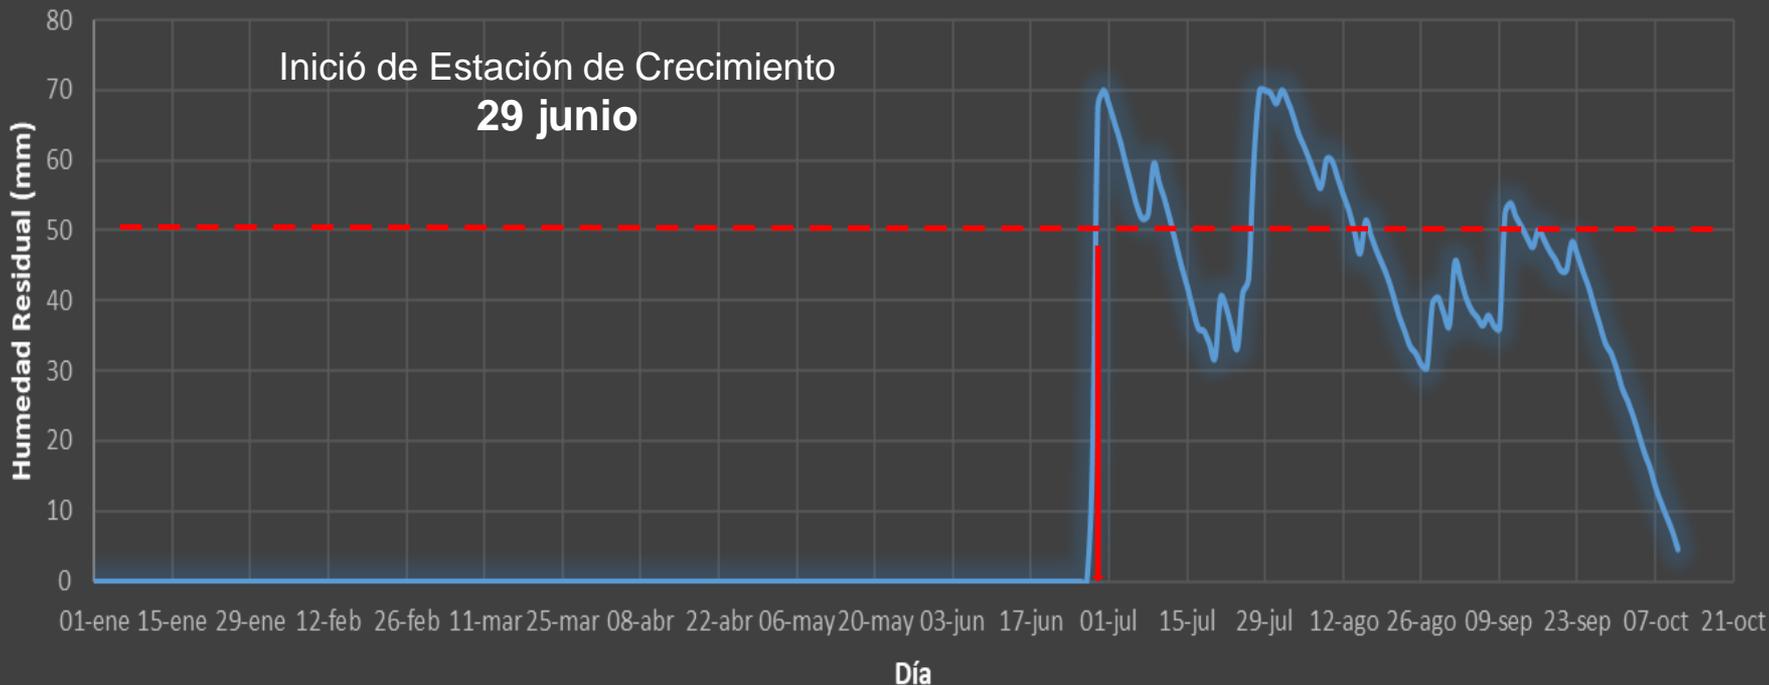

# Los Magueyes – Dolores Hidalgo

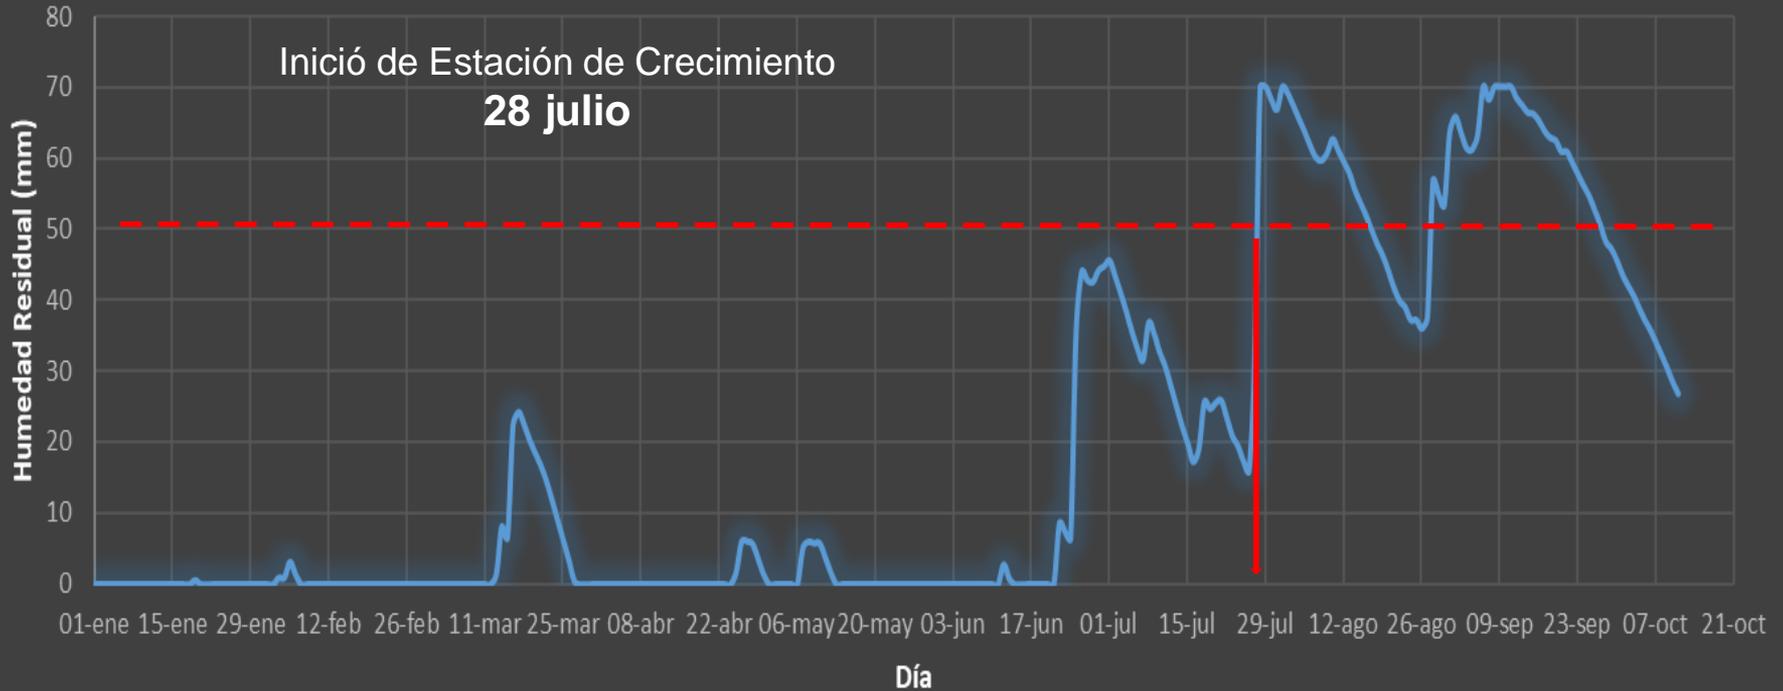

# El Sauz – Dolores Hidalgo

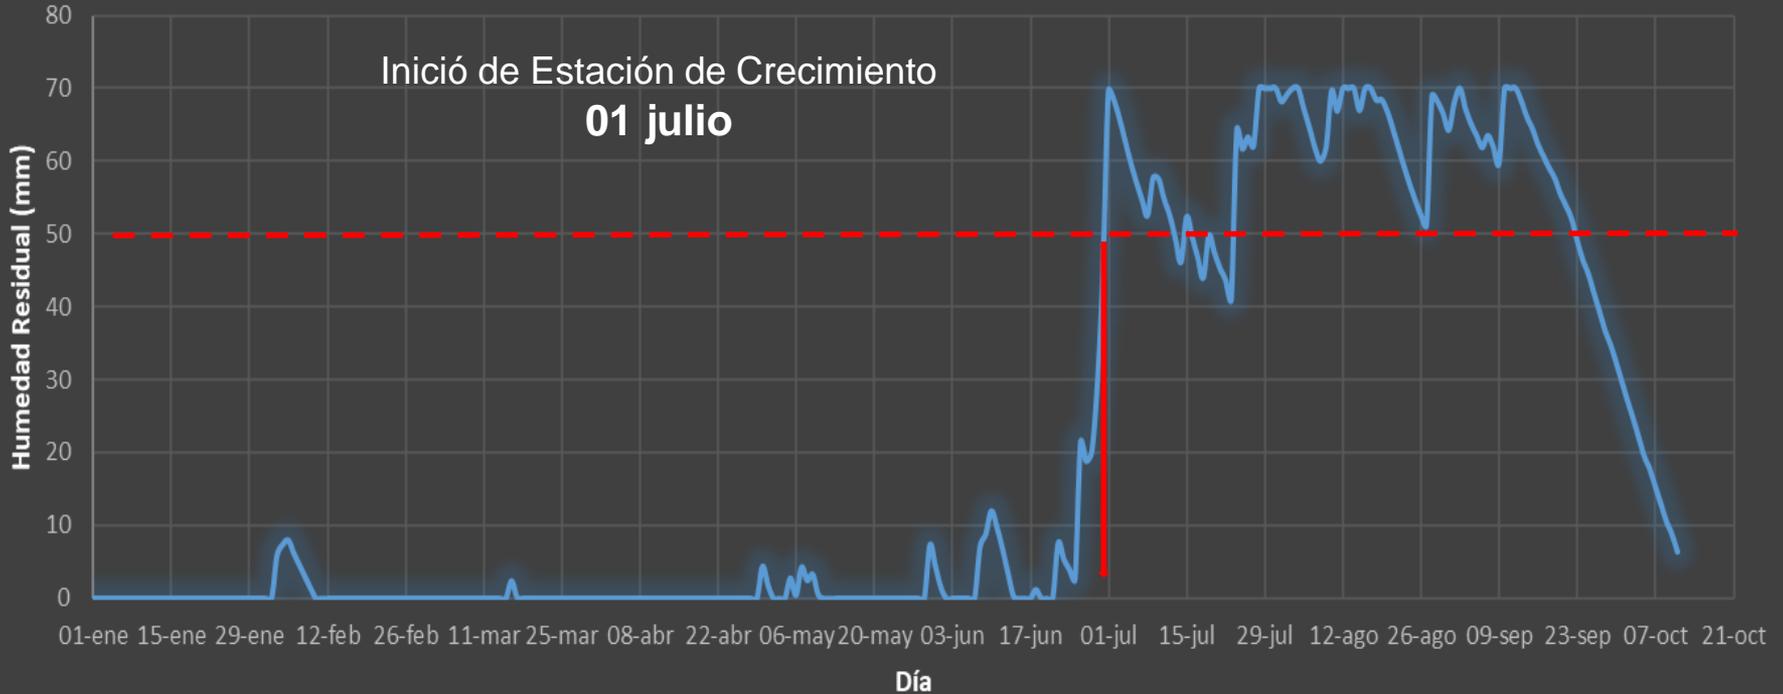

# Los Arquitos – Dr. Mora

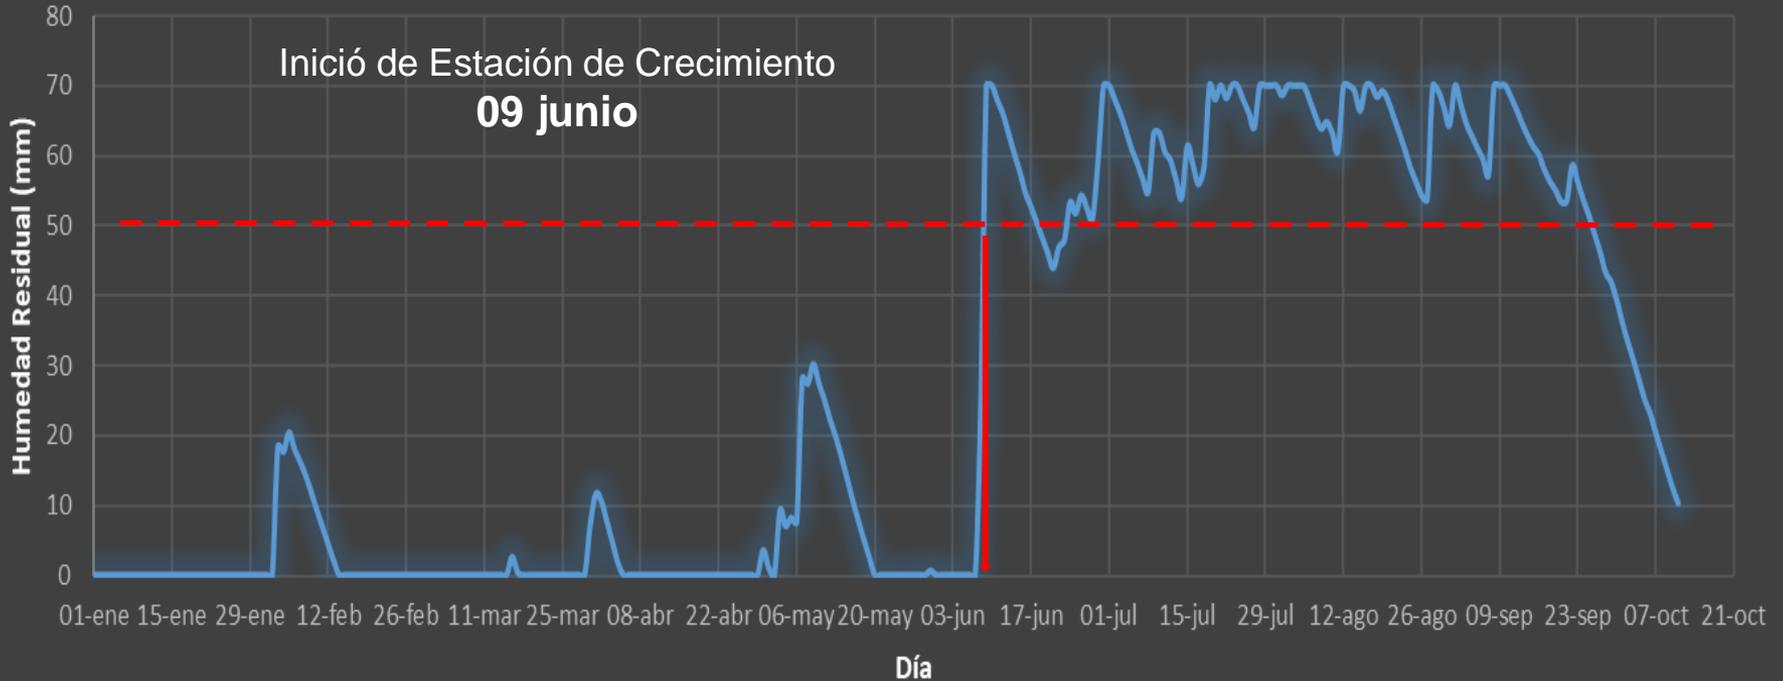

# CBTA 2020 - Irapuato

Inició de Estación de Crecimiento  
**01 julio**

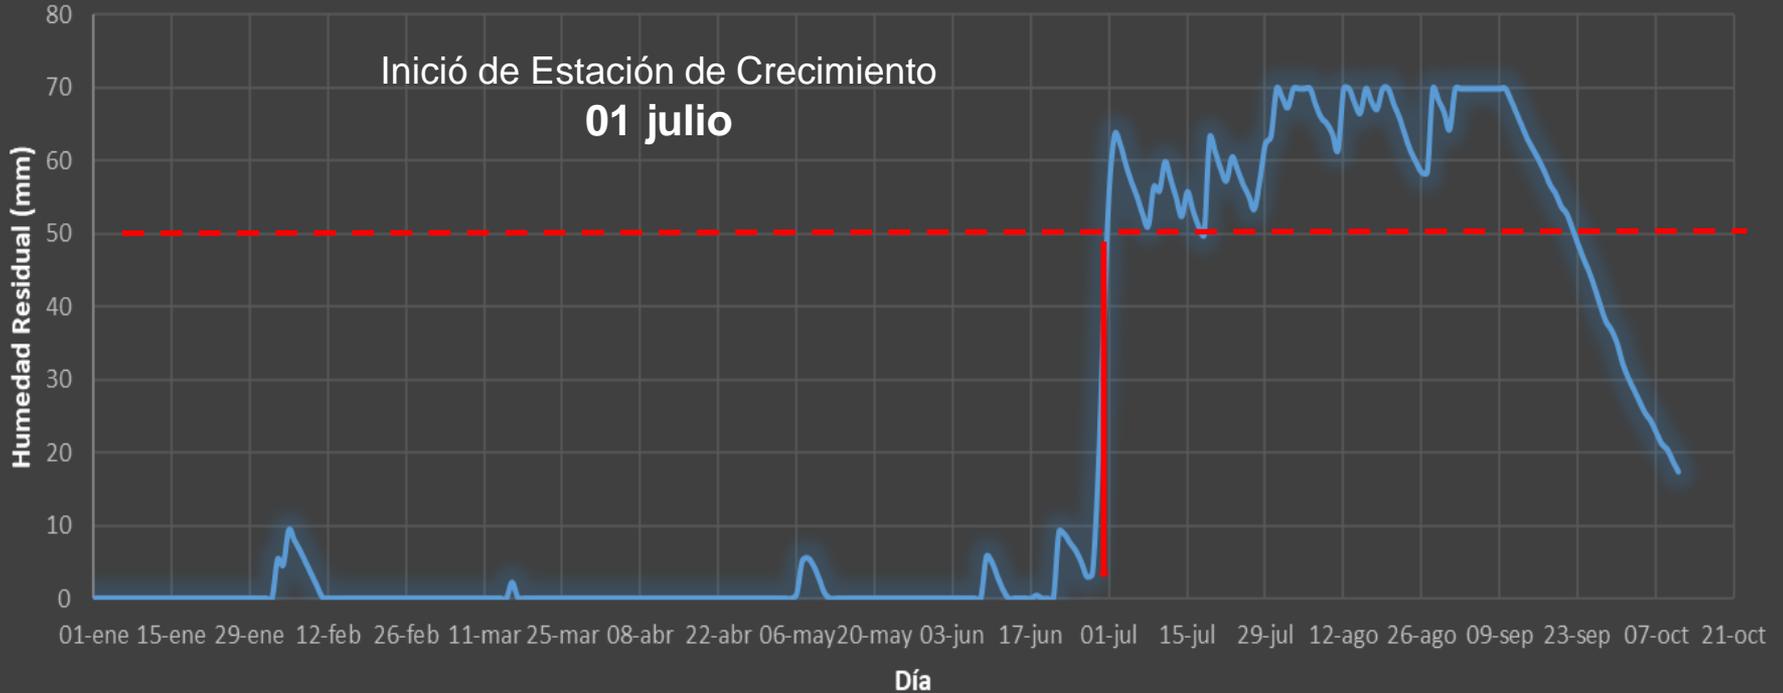

# El Copal- Irapuato

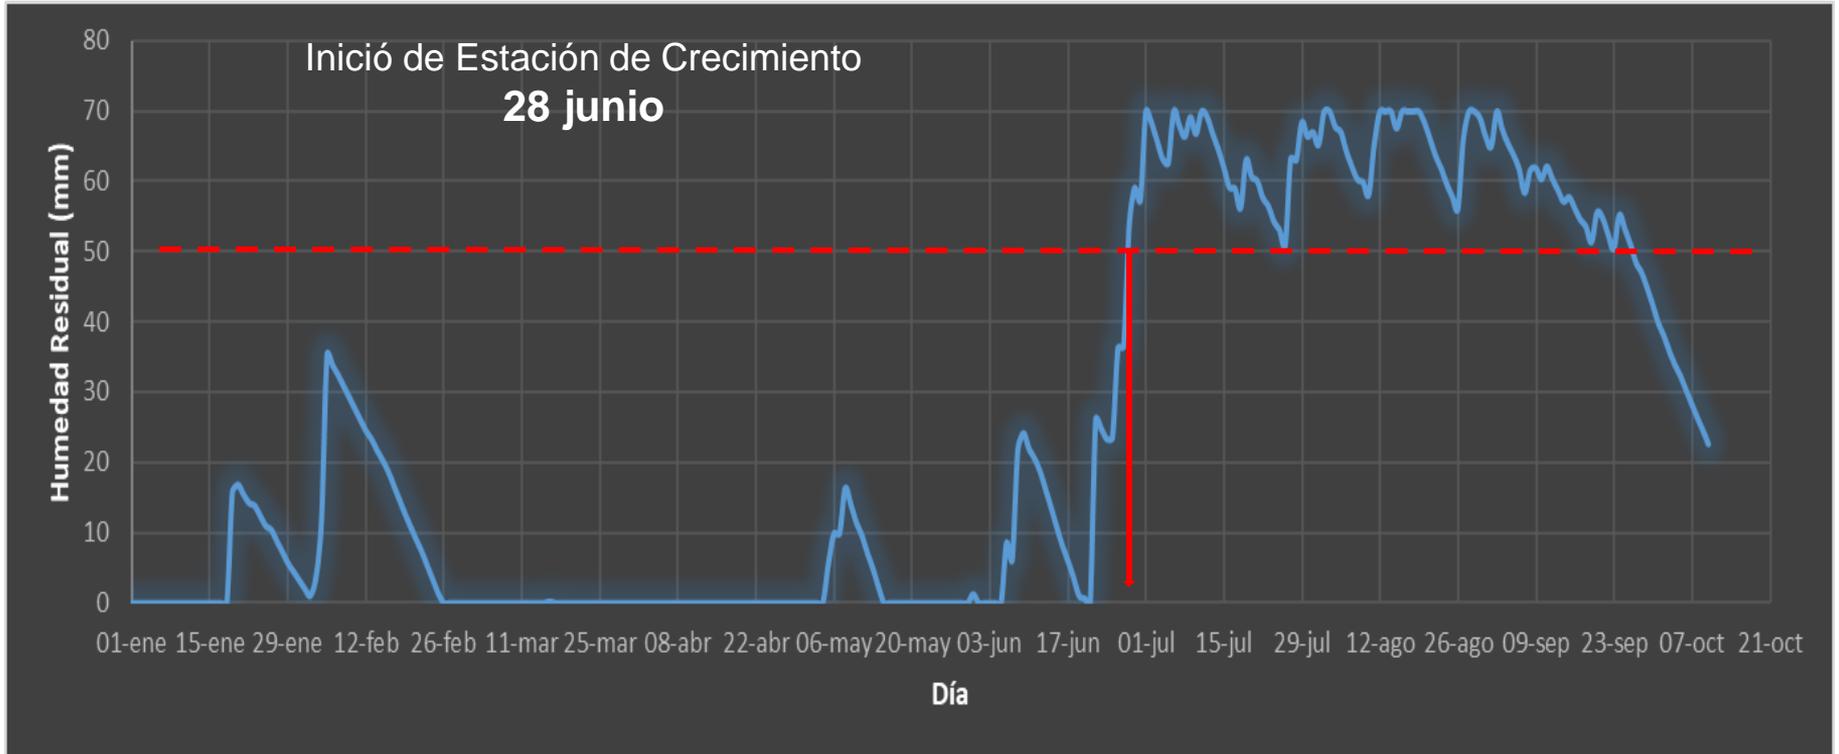

# Distrito de Riego 011 - Irapuato

Inició de Estación de Crecimiento  
**01 julio**

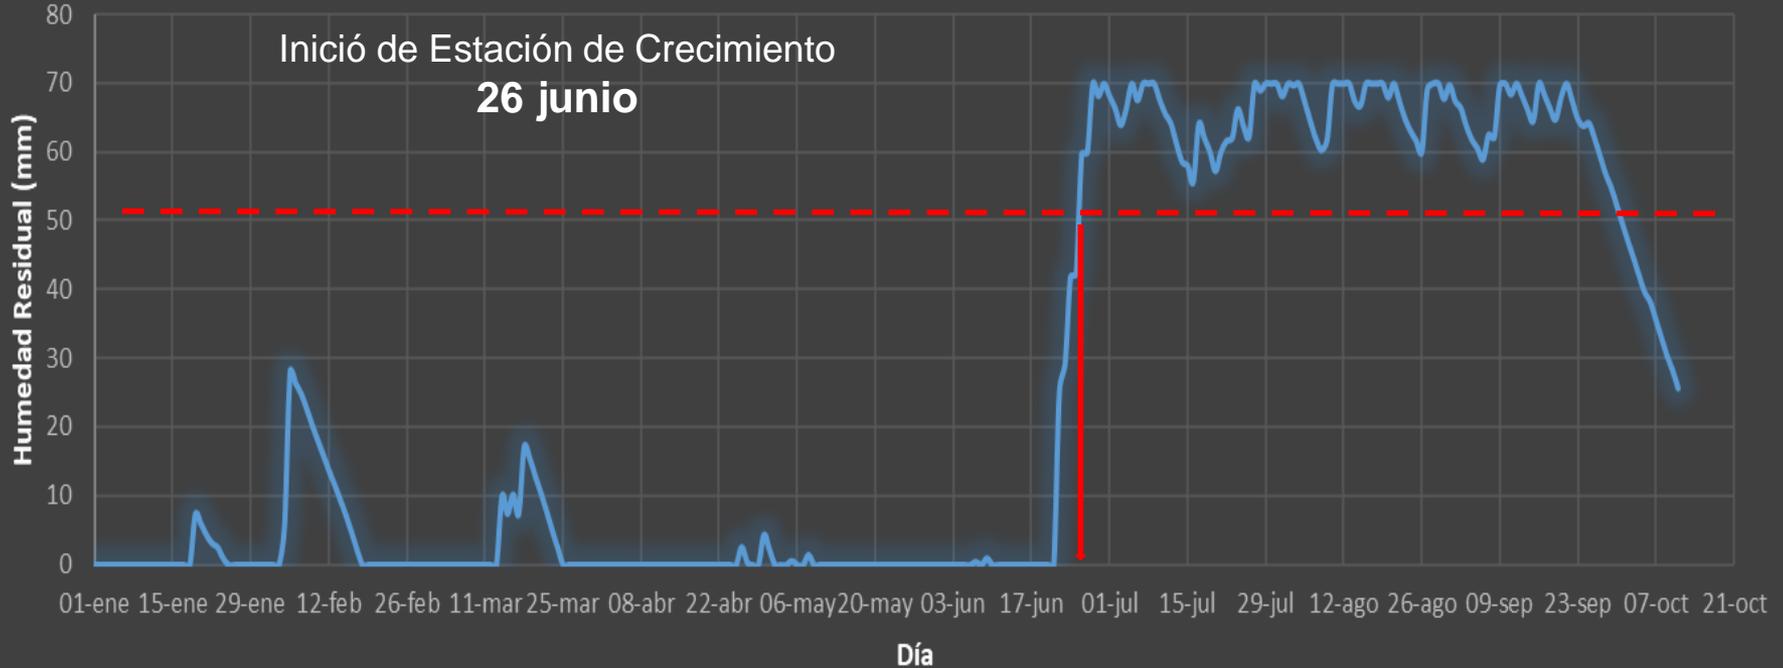

# Victoria de Cortazar – Jaral del Progreso

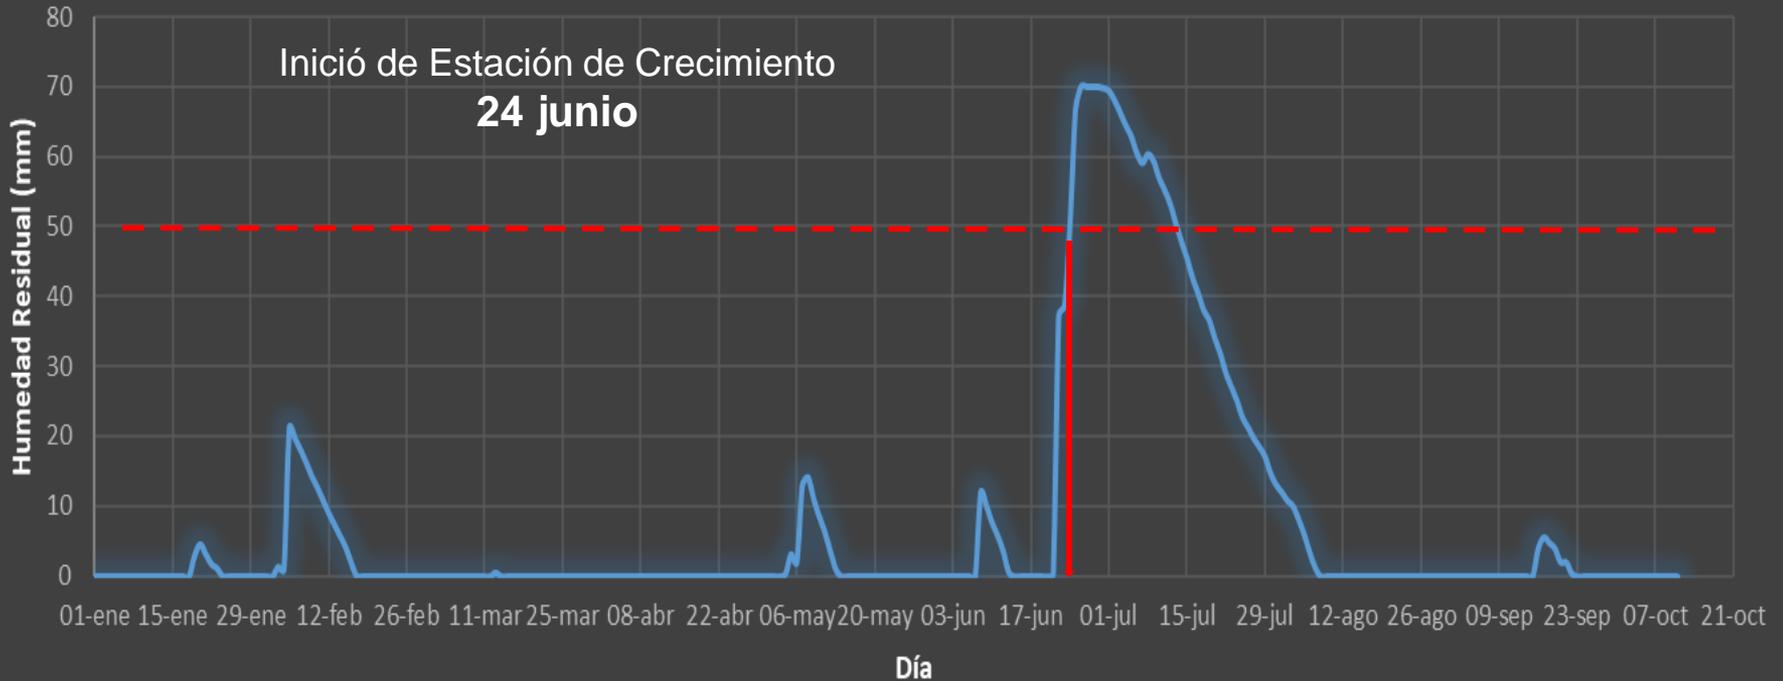

# Puruaguita – Jerécuaro

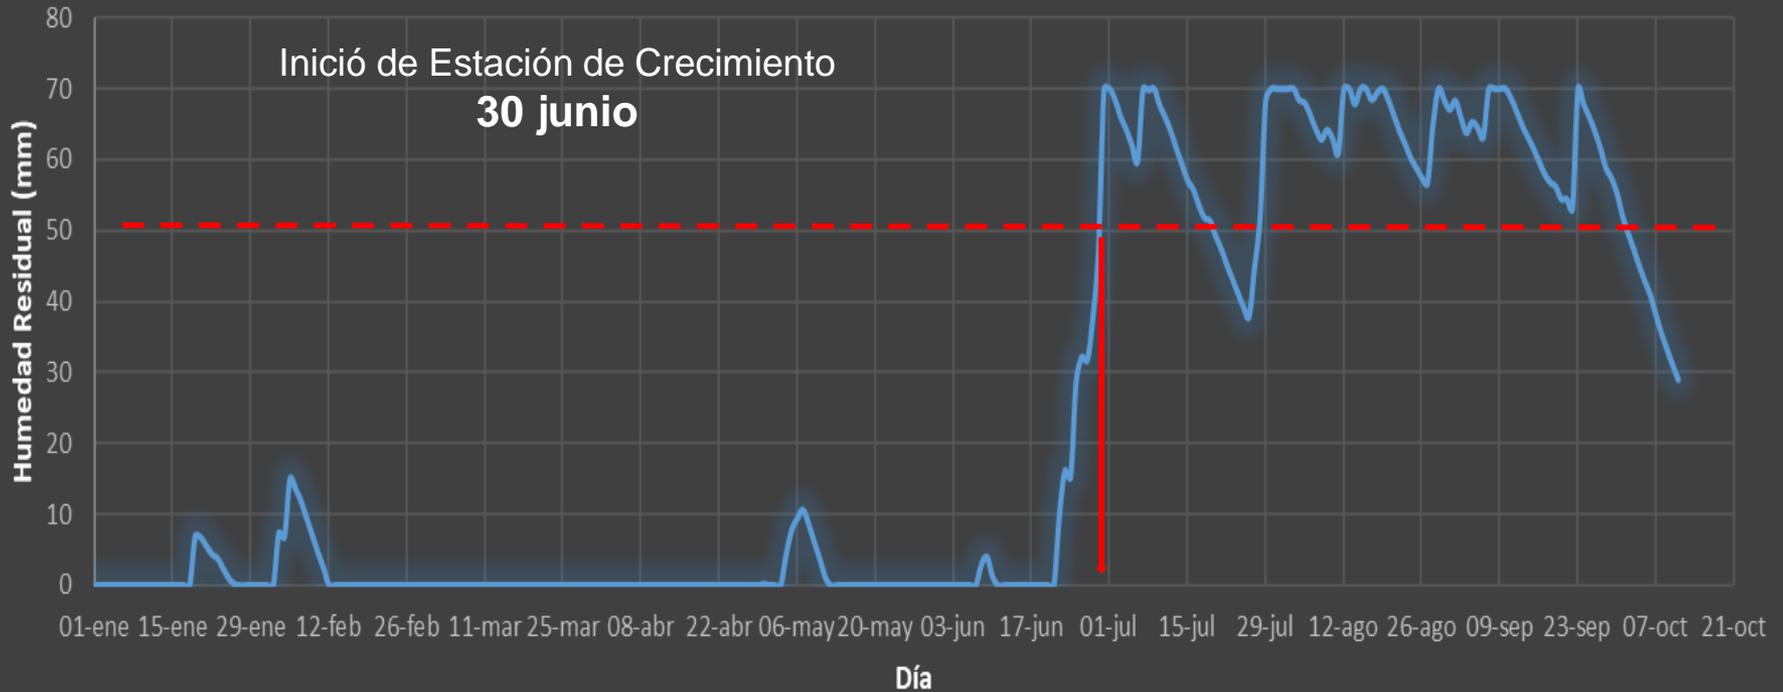

# San Antonio – Jerécuaro

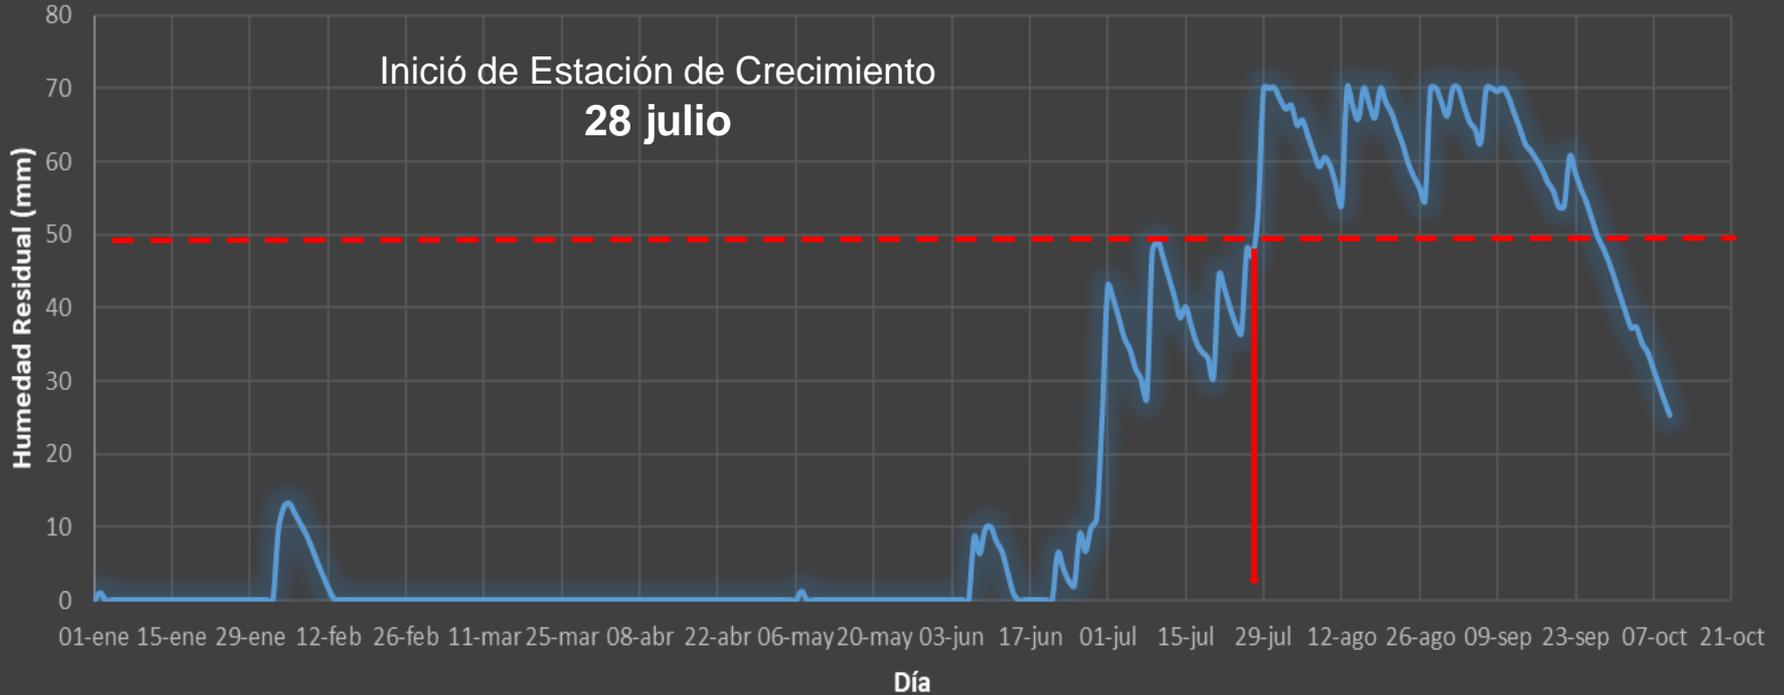

# San Carlos – Juventino Rosas

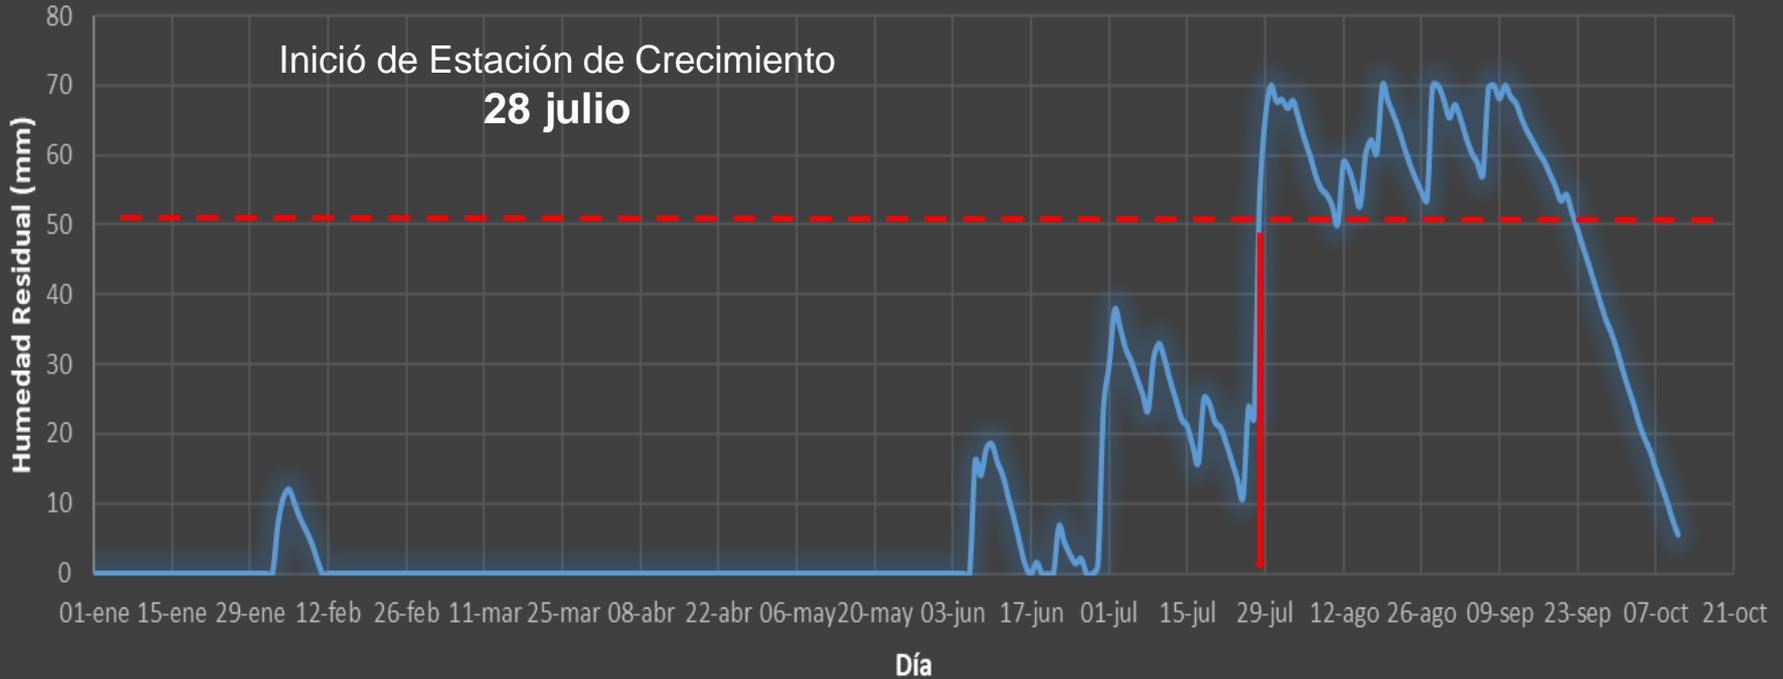

# Agroeduca - León

Inició de Estación de Crecimiento  
**28 julio**

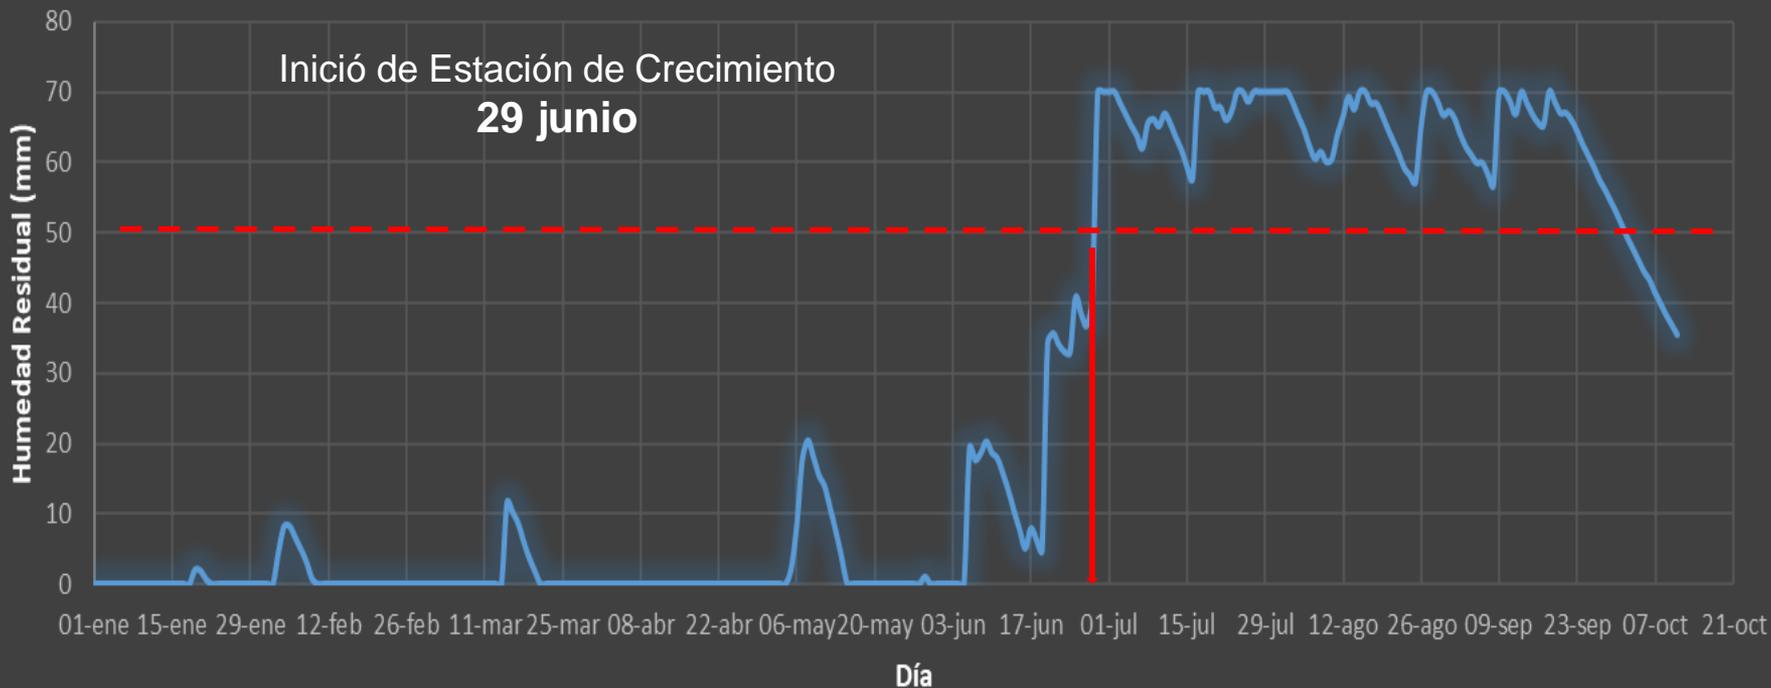

# La Sandia – León

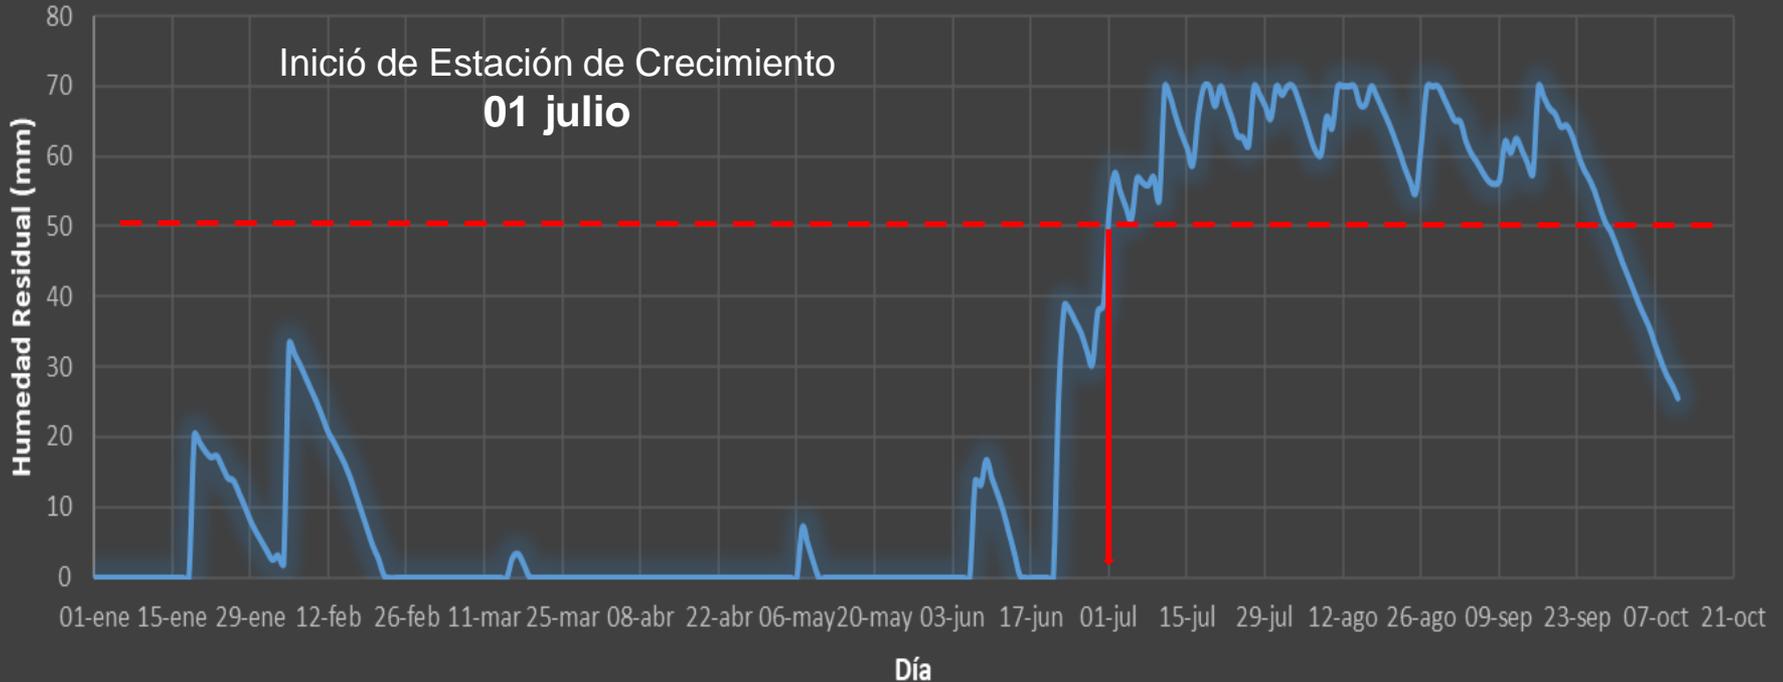

# El Vallado – Manuel Doblado

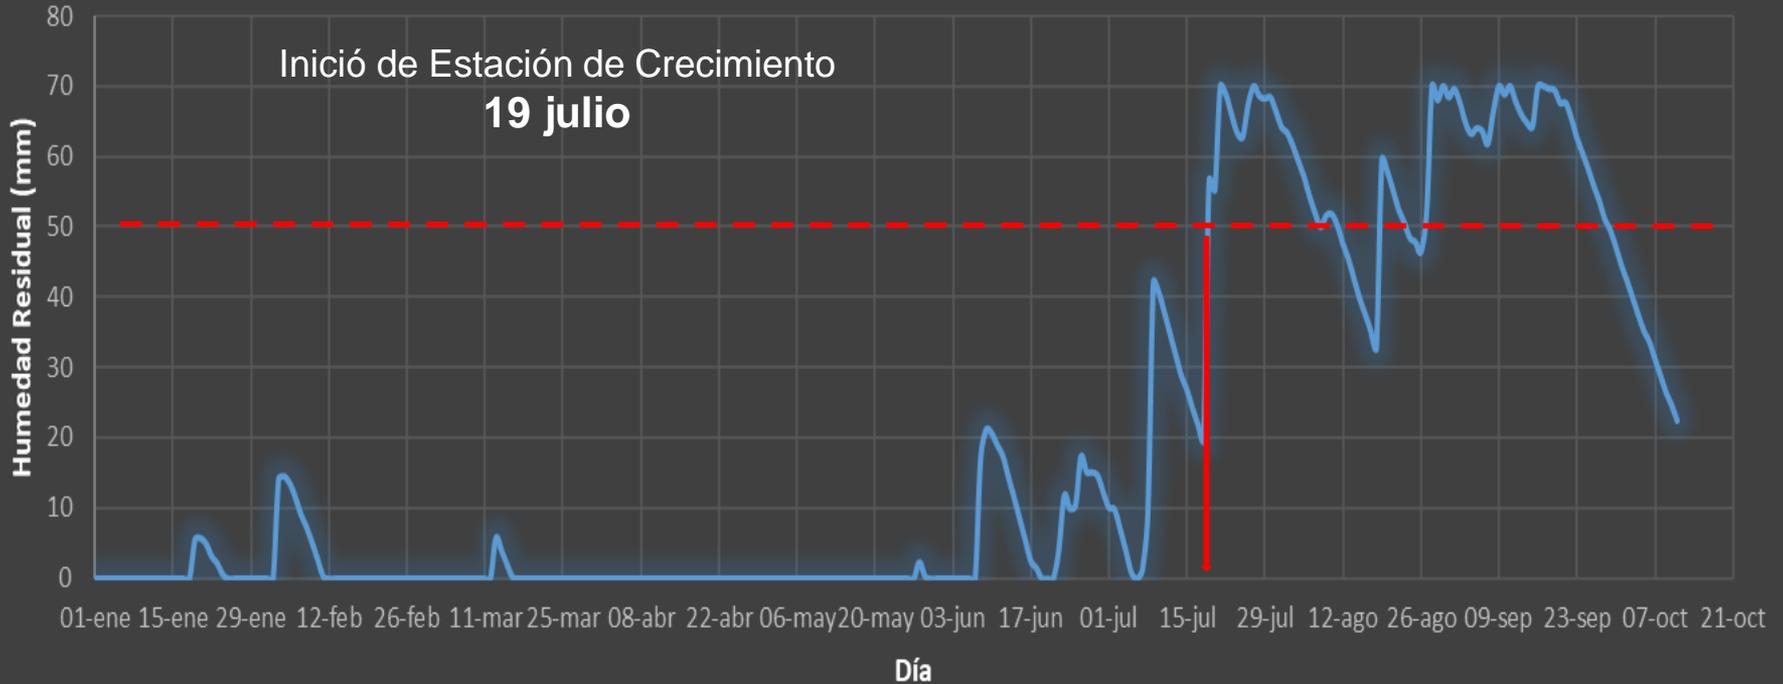

# El Revolcao – Moroleón
